How i n f e c t i o n  
s p r e a d s

Infection is spread by people how cough and touch an object or touch you, and you touch the object and then touch your eye, mouth, ears, or food

How to avoid  
i n f e c t i o n

To avoid infection you must wash your whole hand including under rings a between fingers. Then you must dry your hands so the bacteria have no were to live. Last you must stay clean by using a cloth to turn off the water and open the door.
