How to use:

- Look up your course – they are listed alphabetically.
- Check out the learning outcomes for the course. A link is provided to reach the appendix that contains the Prescribed Learning Outcomes. The learning outcomes describe what is to be learned in that course. By looking at the learning outcomes, you will be able to see where there may be a match between the course and some of the aspects in your Portfolio. Please be aware that not all assignments linked to these learning outcomes will result in evidence. Check with the teacher about the focus of the class before assuming it will cover all the aspects listed. Where there is no link to the learning outcomes but a program guide listed, the outcomes are not available on the Internet. Teachers of these courses will have the program guide.
- The portfolio aspects have been examined for their overlap of the learning outcomes of the course and the matches are listed. The matches will be for all grade levels listed unless otherwise indicated.
