## INTRODUCTION

This report provides a summary of ministry-collected student achievement data for this school, intended to support discussions about student performance and school planning.

When interpreting student performance it is important to review multiple sources of information, including locally collected performance data. It is also important to consider the economic, cultural and social context of the learning environment.

**Please note:** The Ministry makes small and continuous improvements to the quality of its data. Sometimes these changes result in differences from previously published reports. The data in this report are the most accurate data available at time of publication. Ministry Reports are available at: [www.bced.gov.bc.ca/reporting/](http://www.bced.gov.bc.ca/reporting/)

## GUIDELINES AND TIPS - REVIEWING STUDENT ACHIEVEMENT DATA

- **Use multiple sources of information whenever possible**

To increase confidence in the student results being reviewed, it is advisable to refer to multiple sources of performance information including information drawn at the classroom, school, district and provincial levels. This is particularly important when reviewing the performance of small numbers of students.

- **Ensure comparability of information from different sources**

When analysing student results collected from different sources, care should be taken to ensure comparability. For example, consider the similarity of test questions, student groups participating, the number of students represented, as well as the consistency in test administration.

- **Consider participation rates**

Low participation rates, or small numbers of students, may not adequately reflect the whole population. When comparing different sources of data, or trends over time, it is also important to note if fewer, or if more students participating would have a bearing on the results.

- **Be cautious of data representing small numbers of students**

Notice the number of students participating or the number of students in the population being assessed. The fewer the students, the more carefully the results need to be interpreted. If data represent fewer than 10 students, be extremely cautious. The overall results for smaller groups of students can be greatly influenced by the scores of just a few (one or two) individuals. Protection of privacy must be ensured when reporting data, see:

[www.bced.gov.bc.ca/reporting/privacy.php](http://www.bced.gov.bc.ca/reporting/privacy.php)

- **Review data trends**

Multiple years of results are more meaningful than results of a single year. Five or more results may suggest a trend. The more results that follow the trend the greater the ability to make a prediction.

## POINTS OF INQUIRY

- Are the data relevant or appropriate for what is being assessed?
- Is the population of students captured by these data representative of student achievement at this school?
- What story do these data suggest about student achievement in this school?
- Do the data tell enough of the story? In order to provide a more complete picture, what other information should be considered?
- Are there any identifiable groups of students that should be considered?
- What alternate conclusions could be drawn from these data?

## STUDENT AND SCHOOL CONTEXT

Contextual information about the learning environment (e.g., social, economic or cultural factors; knowledge of student experiences) may provide insight and assist in a deeper understanding and interpretation of student achievement results.

**FOUNDATION SKILLS ASSESSMENT (FSA) RESULTS: OVERVIEW**

Annual FSA results provide a snapshot of student achievement in grades 4 and 7. These data provide an external source of information about student performance to complement locally collected data when evaluating reading comprehension, writing and numeracy skills.

Data and graphics given in this overview are school-level information only, and are designed to provide an easy means for comparing results in the three areas evaluated by FSA. More detailed information, including district and provincial data, are provided on the pages that follow.

**DATA SYMBOLS**

## FOUNDATION SKILLS ASSESSMENT (FSA) RESULTS: READING COMPREHENSION

Annual FSA results provide a snapshot of student achievement in grades 4 and 7. These data provide an external source of information about student performance to complement locally collected data when evaluating reading.

No single assessment or indicator can illustrate whether students have learned all that is expected. Multiple measures of data and tracking results over time will provide a more complete picture of student learning.

When reviewing FSA results, it is valuable to examine and discuss other achievement results and the significance of the variety of factors that could affect FSA scores such as characteristics of students assessed in a given year, staff changes, local events, etc.

## GRADE-TO-GRADE TRANSITION

Transition rates describe the number of students from this school who made a transition to a higher grade anywhere in the BC school system.

When reviewing transitions, it may be valuable to examine and discuss achievement results with respect to prescribed learning outcomes, and the significance of the variety of factors that could affect transition, such as student experiences and attendance, curriculum relevance, instructional strategies, school policies and planning, etc.

## SATISFACTION SURVEY

The Satisfaction Survey annually collects opinions from students, parents and school staff on achievement, human and social development and safety.

Survey responses provide another resource to complement locally collected information when discussing student results and school values. When reviewing survey data it is valuable to examine trends in the data and also discuss the significance of a variety of factors that could affect survey responses such as the number and characteristics of students represented, local events, school activities, curriculum relevance, etc.

## FOUNDATION SKILLS ASSESSMENT (FSA) RESULTS: WRITING ABORIGINAL

Annual FSA results provide a snapshot of student achievement in grades 4 and 7. These data provide an external source of information about student performance to complement locally collected data when evaluating writing.

No single assessment or indicator can illustrate whether students have learned all that is expected. Multiple measures of data and tracking results over time will provide a more complete picture of student learning.

When reviewing FSA results, it is valuable to examine and discuss other achievement results and the significance of the variety of factors that could affect FSA scores such as characteristics of students assessed in a given year, staff changes, local events, etc.

Annual FSA results provide a snapshot of student achievement in grades 4 and 7. These data provide an external source of information about student performance to complement locally collected data when evaluating numeracy skills.

No single assessment or indicator can illustrate whether students have learned all that is expected. Multiple measures of data and tracking results over time will provide a more complete picture of student learning.

When reviewing FSA results, it is valuable to examine and discuss other achievement results and the significance of the variety of factors that could affect FSA scores such as characteristics of students assessed in a given year, staff changes, local events, etc.
