### SOCIAL STUDIES K TO 7 IRP WRITING TEAM

---

Karen Floyd	School District No. 41 (Burnaby)
Ian Hargreaves	School District No. 71 (Comox Valley)
Brenda Jones	School District No. 36 (Surrey)
Barry Krangle	School District No. 46 (Sunshine Coast)
Heather Lapper	Independent Schools – Victoria
Janet Townsend	School District No. 22 (Vernon)
GT Publishing Services Ltd.	Project co-ordination, writing, and editing

This Integrated Resource Package (IRP) provides basic information teachers will require in order to implement Social Studies K to 7. Once fully implemented, this document will supersede the *Social Studies K to 7 Integrated Resource Package* (1998).

The information contained in this document is also available on the Internet at [www.bced.gov.bc.ca/irp/irp.htm](http://www.bced.gov.bc.ca/irp/irp.htm)

The following paragraphs provide brief descriptions of the components of the IRP.

## INTRODUCTION

The Introduction provides general information about Social Studies K to 7, including special features and requirements.

Included in this section are

- a rationale for teaching Social Studies K to 7 in BC schools
- the curriculum goals
- descriptions of the curriculum organizers – groupings for prescribed learning outcomes that share a common focus
- an overview of the curriculum content

## CONSIDERATIONS FOR PROGRAM DELIVERY

This section of the IRP contains additional information to help educators develop their school practices and plan their program delivery to meet the needs of all learners.

## PRESCRIBED LEARNING OUTCOMES

This section contains the *prescribed learning outcomes*, the legally required content standards for the provincial education system. The learning outcomes define the required attitudes, skills, and knowledge for each subject. They are statements of what students are expected to know and be able to do by the end of the indicated grade.

## STUDENT ACHIEVEMENT

This section of the IRP contains information about classroom assessment and measuring student achievement, including sets of specific achievement indicators for each prescribed learning outcome. Achievement indicators are statements that describe what students should be able to do in order to demonstrate that they fully meet the expectations set out by the prescribed learning outcomes. Achievement indicators are not mandatory; they are provided to assist in assessing how well students achieve the prescribed learning outcomes.

Also included in this section are key elements – descriptions of content that help determine the intended depth and breadth of the prescribed learning outcomes.

## CLASSROOM ASSESSMENT MODEL

This section contains a series of assessment units that address clusters of learning outcomes organized by topic or theme. The units have been developed by BC educators, and are provided to support classroom assessment. These units are suggestions only – teachers may use or modify the units as they plan for the implementation of this curriculum.

Each grade in the model contains an Assessment Overview Table intended to support teachers with their assessment practices, and the assessment units organized by topic – including the prescribed learning outcomes and a sequence of suggested assessment activities for each topic. Sample assessment instruments are also included for each grade.

## LEARNING RESOURCES

This section contains general information on learning resources, and provides a link to the titles, descriptions, and ordering information for the recommended learning resources in the Social Studies K to 7 Grade Collections.

# INTRODUCTION

---

This Integrated Resource Package (IRP) sets out the provincially prescribed curriculum for Social Studies K to 7. The development of this IRP has been guided by the principles of learning:

- Learning requires the active participation of the student.
- People learn in a variety of ways and at different rates.
- Learning is both an individual and a group process.

In addition to these three principles, this document recognizes that British Columbia’s schools include young people of varied backgrounds, interests, abilities, and needs. Wherever appropriate for this curriculum, ways to meet these needs and to ensure equity and access for all learners have been integrated as much as possible into the learning outcomes, achievement indicators, instructional activities, and assessment activities.

Social Studies K to 7, in draft format, was available for public review and response from December 2005 through February 2006. Feedback from educators, students, parents, and other educational partners also informed the development of this document.

### RATIONALE

The aim of Social Studies K to 7 is to develop thoughtful, responsible, and active citizens who are able to acquire the requisite information to consider multiple perspectives and to make reasoned judgments.

The Social Studies K to 7 curriculum provides students with opportunities to reflect critically upon events and issues in order to examine the present, make connections with the past, and consider the future. The curriculum emphasizes

- developing understanding – encouraging in-depth study from multiple perspectives (e.g., time, place, culture, values) and leading students to think critically and make reasoned judgments
- making connections – between historical and contemporary events and issues, and between various regions, environments, and cultures around the world
- applying knowledge – allowing students to inform their judgments, shape their opinions, solve problems, and guide their actions
- practising active citizenship – developing the skills, attitudes, and processes necessary to be responsible, active citizens

### GOALS FOR SOCIAL STUDIES K TO 7

The following goals reflect and are represented in the prescribed learning outcomes for Social Studies K to 7 in each curriculum organizer.

Through their participation in social studies, students will be encouraged and enabled to

- understand and prepare to exercise their roles, rights, and responsibilities within their family, the community, Canada, and the world
- demonstrate respect for human equality and cultural diversity
- acquire an understanding of and appreciation for the historical and geographical forces that have shaped and continue to shape Canadian society and the societies of countries around the world
- develop the skills and attitudes necessary to become thoughtful, active participants in their communities and as global citizens

### CURRICULUM ORGANIZERS

A curriculum organizer consists of a set of prescribed learning outcomes that share a common focus. The prescribed learning outcomes for Social Studies K to 7 are grouped under the following curriculum organizers:

Curriculum Organizers
SKILLS AND PROCESSES OF SOCIAL STUDIES
IDENTITY, SOCIETY, AND CULTURE
GOVERNANCE
ECONOMY AND TECHNOLOGY
HUMAN AND PHYSICAL ENVIRONMENT

Note that these five organizers are for the purpose of identifying prescribed learning outcomes; they are not intended to suggest a linear means of course delivery.

#### *Skills and Processes of Social Studies*

Prescribed learning outcomes for this organizer focus on providing opportunities for students to

- identify and apply solutions to problems and issues
- gather, interpret, analyse, and present information
- practise active citizenship

These learning outcomes are intended to provide a framework to be used throughout the curriculum to support the skills and processes essential to social studies and to help students become responsible, thoughtful citizens.

### *Identity, Society, and Culture*

Students learn about the characteristics that define self, cultures, and societies, and the similarities and differences within and across cultures over time.

### *Governance*

Students are given opportunities to develop a basic understanding of political and legal structures and processes, through which they can gain an appreciation of the purpose of governance in a variety of societies. Rights and responsibilities of citizenship and the role of participation are examined at community, national, and world levels.

### *Economy and Technology*

Students are given opportunities to develop an understanding of basic economic concepts and systems. They also explore the impact of technological innovation on individuals, society, and the environment.

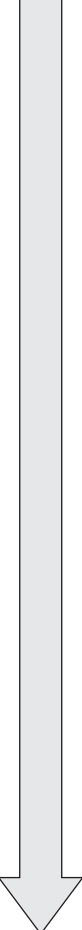

### *Human and Physical Environment*

Students learn basic geographic skills and apply them to enhance their understanding of natural environments and relationships between people and natural systems. They explore the influence of physical geography and apply their understanding to areas such as resource development, stewardship, and sustainability.

### **SUGGESTED TIMEFRAME**

Provincial curricula are developed in accordance with the number of instructional hours allocated for each subject area, while still allowing for flexibility to address local needs. For Social Studies, approximately 90-100 instructional hours per school year is recommended for Grades 1 to 7; for Kindergarten, approximately 45-50 hours is recommended.

**SOCIAL STUDIES K TO 12 – AT A GLANCE**

<b>K to 7</b>	Social Studies Kindergarten to Grade 7: required for all students
<b>8 and 9</b>	Social Studies Grades 8 and 9: required for all students
<b>10</b>	Social Studies 10: required for all students
<b>11</b>	<p>Students must take at least one of the following courses to graduate:</p> <ul style="list-style-type: none"> <li>• BC First Nations Studies 12</li> <li>• Civic Studies 11</li> <li>• Social Studies 11</li> </ul> <p>Each of these courses includes a required Graduation Program examination worth 20% of the final mark.</p>
<b>12</b>	<p>Elective courses:</p> <ul style="list-style-type: none"> <li>• Comparative Civilizations 12</li> <li>• Geography 12</li> <li>• History 12</li> <li>• Law 12</li> </ul> <p>Geography 12 and History 12 include optional Graduation Program examinations worth 40% of the final mark for students who choose to write them.</p>

OVERVIEW OF SOCIAL STUDIES K TO 7 TOPICS

	<b>Kindergarten</b> <i>Self, Family, School</i>	<b>Grade 1</b> <i>Self, Family, School</i>	<b>Grade 2</b> <i>Self, Family, School</i>	<b>Grade 3</b> <i>Communities – Past and Present</i>
<b>SKILLS AND PROCESSES OF SOCIAL STUDIES</b>	<ul style="list-style-type: none"> <li>co-operative participation in groups</li> <li>gathering information</li> <li>presenting information orally and visually</li> </ul>	<ul style="list-style-type: none"> <li>simple picture maps</li> <li>co-operative participation in groups</li> <li>gathering and presenting information orally, visually, and written</li> <li>strategies for solving problems</li> </ul>	<ul style="list-style-type: none"> <li>simple maps with cardinal directions, symbols, and legends</li> <li>gathering information for presentation</li> <li>problem solving in the class or school</li> </ul>	<ul style="list-style-type: none"> <li>critical thinking</li> <li>simple maps</li> <li>gathering information; citing sources appropriately; presentation skills</li> <li>chronological order</li> <li>responses to problems</li> </ul>
<b>IDENTITY, CULTURE, AND SOCIETY</b>	<ul style="list-style-type: none"> <li>concept of change</li> <li>groups that are part of their lives</li> <li>places that are part of their lives</li> <li>similarities and differences among families</li> </ul>	<ul style="list-style-type: none"> <li>changes in their lives</li> <li>similarities and differences among families</li> <li>social structures</li> <li>ways people work together in groups</li> <li>symbols of Canada</li> </ul>	<ul style="list-style-type: none"> <li>changes in the school and community</li> <li>ways individuals contribute to a community</li> <li>personal identity</li> <li>language and cultural characteristics of Canada</li> </ul>	<ul style="list-style-type: none"> <li>changes in communities over time</li> <li>importance of communities</li> <li>cultural similarities and differences</li> <li>characteristics of Canadian society</li> </ul>
<b>GOVERNANCE</b>	<ul style="list-style-type: none"> <li>roles and responsibilities within the class and school</li> <li>purpose of classroom and school rules</li> </ul>	<ul style="list-style-type: none"> <li>roles, responsibilities, and rights at home and at school</li> <li>purpose of classroom and school rules</li> </ul>	<ul style="list-style-type: none"> <li>roles, rights, and responsibilities within the class and school</li> <li>how decisions are made in groups</li> </ul>	<ul style="list-style-type: none"> <li>rights and responsibilities and the well-being of the community</li> <li>roles and responsibilities of local governments</li> </ul>
<b>ECONOMY AND TECHNOLOGY</b>	<ul style="list-style-type: none"> <li>human needs</li> <li>work in the community</li> <li>technologies in daily life</li> </ul>	<ul style="list-style-type: none"> <li>how basic needs are met</li> <li>types of work in the community</li> <li>purpose of money</li> <li>ways technology is used</li> </ul>	<ul style="list-style-type: none"> <li>work done in the school</li> <li>purpose of money</li> <li>how technology affects individuals and schools</li> </ul>	<ul style="list-style-type: none"> <li>how needs and wants are met in communities</li> <li>how technology affects individuals and communities past and present</li> </ul>
<b>HUMAN AND PHYSICAL ENVIRONMENT</b>	<ul style="list-style-type: none"> <li>natural and human-built characteristics of environments</li> <li>ways to care for their environment</li> </ul>	<ul style="list-style-type: none"> <li>recognizing maps of Canada</li> <li>characteristics of environments</li> <li>how environment affects daily life</li> <li>ways to care for their environment</li> </ul>	<ul style="list-style-type: none"> <li>landforms and bodies of water in BC and Canada</li> <li>responsibility to the environment</li> <li>how environment affects human activities</li> </ul>	<ul style="list-style-type: none"> <li>landforms and bodies of water in BC and Canada</li> <li>provinces and territories</li> <li>responsibility for the environment</li> <li>effect of environment on early settlement</li> </ul>

# CONSIDERATIONS FOR PROGRAM DELIVERY

---

This section of the IRP contains additional information to help educators develop their school practices and plan their program delivery to meet the needs of all learners. Included in this section is information about

- Alternative Delivery policy
- addressing local contexts
- involving parents and guardians
- establishing a positive classroom climate
- confidentiality
- inclusion, equity, and accessibility for all learners
- connections to other subject areas
- working with the school and community
- working with the Aboriginal community
- information and communications technology
- copyright and responsibility
- debate
- media analysis

### ALTERNATIVE DELIVERY POLICY

The Alternative Delivery policy does not apply to Social Studies K to 7.

The Alternative Delivery policy outlines how students, and their parents or guardians, in consultation with their local school authority, may choose means other than instruction by a teacher within the regular classroom setting for addressing prescribed learning outcomes contained in the Health curriculum organizer of the following curriculum documents:

- Health and Career Education K to 7, and Personal Planning K to 7 Personal Development curriculum organizer (until September 2008)
- Health and Career Education 8 and 9
- Planning 10

The policy recognizes the family as the primary educator in the development of children's attitudes, standards, and values, but the policy still requires that all prescribed learning outcomes be addressed and assessed in the agreed-upon alternative manner of delivery.

It is important to note the significance of the term "alternative delivery" as it relates to the Alternative Delivery policy. The policy does not permit schools to omit addressing or assessing any of the prescribed learning outcomes within the health and career education curriculum. Neither does it allow

students to be excused from meeting any learning outcomes related to health. It is expected that students who arrange for alternative delivery will address the health-related learning outcomes and will be able to demonstrate their understanding of these learning outcomes.

For more information about policy relating to alternative delivery, refer to [www.bced.gov.bc.ca/policy/](http://www.bced.gov.bc.ca/policy/)

### ADDRESSING LOCAL CONTEXTS

The Social Studies K to 7 curriculum includes opportunities for individual teacher and student choice in the exploration of topics to meet certain learning outcomes. This flexibility allows educators to plan their programs to meet the particular requirements of their students and to respond to local contexts. It may be appropriate to allow for student input when selecting current and relevant topics.

Where specific topics have been included in the learning outcomes, the intent is for all students to have an opportunity to address these important issues. The inclusion of these topics is not intended to exclude any additional issues that may also be relevant for individual school communities.

### INVOLVING PARENTS AND GUARDIANS

The family is the primary educator in the development of students' attitudes and values. The school plays a supportive role by focussing on the prescribed learning outcomes in the Social Studies K to 7 curriculum. Parents and guardians can support, enrich, and extend the curriculum at home.

It is highly recommended that schools inform parents and guardians about the Social Studies K to 7 curriculum, and teachers (along with school and district administrators) may choose to do so by

- informing parents/guardians and students of the prescribed learning outcomes for the subject by sending home class letters, providing an overview during parent-teacher interviews, etc.
- responding to parent and guardian requests to discuss unit plans, learning resources, etc.

## ESTABLISHING A POSITIVE CLASSROOM CLIMATE

Teachers are responsible for setting and promoting a classroom climate in which students feel comfortable learning about and discussing topics in Social Studies K to 7. The following are some guidelines that may help educators establish and promote a positive classroom climate.

- Allow class members sufficient time and opportunities to become comfortable with each other before engaging in group discussion. It is important that the classroom climate encourage students to relate to one another in positive, respectful, and supportive ways. Be prepared to facilitate any potentially controversial discussions.
- Establish clear ground rules for class discussions that demonstrate respect for privacy, for diversity, and for the expression of differing viewpoints.
- Become familiar with
  - relevant legislation (e.g., *Human Rights Code*; *Child, Family and Community Services Act*)
  - relevant initiatives (e.g., *Safe, Caring and Orderly Schools: A Guide* and *Diversity in BC Schools: A Framework*)
  - provincial and district policies and protocols concerning topics such as disclosure related to child abuse, and protection of privacy

Further information about these policies and initiatives is available online:

*BC Handbook for Action on Child Abuse and Neglect*

[www.mcf.gov.bc.ca/child\\_protection/pdf/handbook\\_action\\_child\\_abuse.pdf](http://www.mcf.gov.bc.ca/child_protection/pdf/handbook_action_child_abuse.pdf)

*Safe, Caring and Orderly Schools*  
[www.bced.gov.bc.ca/sco/](http://www.bced.gov.bc.ca/sco/)

*Diversity in BC Schools: A Framework*  
[www.bced.gov.bc.ca/diversity/diversity\\_framework.pdf](http://www.bced.gov.bc.ca/diversity/diversity_framework.pdf)

*Human Rights Code*  
[www.qp.gov.bc.ca/statreg/stat/H/96210\\_01.htm](http://www.qp.gov.bc.ca/statreg/stat/H/96210_01.htm)

*Child, Family and Community Services Act*  
[www.qp.gov.bc.ca/statreg/stat/C/96046\\_01.htm](http://www.qp.gov.bc.ca/statreg/stat/C/96046_01.htm)

- Activities and discussion related to some of the topics in Social Studies K to 7 may evoke an emotional response from individual students. Inform an administrator or counsellor when any concern arises, and ensure students know where to go for help and support.
- Discussions related to sexual abuse prevention topics such as touching can result in a student disclosing an incident of abuse and/or neglect. Teachers should be aware of district protocols and provincial regulations for reporting and referrals.
- Ensure that any external groups or organizations making a presentation to students have met the district's guidelines for presenting. There should be a direct relationship between the content of the presentation and the prescribed learning outcomes. Review any materials they may use, especially handouts, for appropriateness.

## CONFIDENTIALITY

The *Freedom of Information and Protection of Privacy Act* (FOIPPA) applies to students, to school districts, and to all curricula. Teachers, administrators, and district staff should consider the following:

- Be aware of district and school guidelines regarding the provisions of FOIPPA and how it applies to all subjects, including Social Studies K to 7.
- Do not use students' Personal Education Numbers (PEN) on any assignments that students wish to keep confidential.
- Ensure students are aware that if they disclose personal information that indicates they are at risk for harm, then that information cannot be kept confidential.
- Inform students of their rights under FOIPPA, especially the right to have access to their own personal information in their school records. Inform parents of their rights to access their children's school records.
- Minimize the type and amount of personal information collected, and ensure that it is used only for purposes that relate directly to the reason for which it is collected.
- Inform students that they will be the only ones recording personal information about themselves unless they, or their parents, have consented to teachers collecting that information from other people (including parents).

- Provide students and their parents with the reason(s) they are being asked to provide personal information in the context of the Social Studies K to 7 curriculum.
- Inform students and their parents that they can ask the school to correct or annotate any of the personal information held by the school, in accordance with Section 29 of FOIPPA.
- Ensure students are aware that their parents may have access to the schoolwork they create only insofar as it pertains to students' progress.
- Ensure that any information used in assessing students' progress is up-to-date, accurate, and complete.

For more information about confidentiality, refer to [www.msers.gov.bc.ca/privacyaccess/](http://www.msers.gov.bc.ca/privacyaccess/)

### **INCLUSION, EQUITY, AND ACCESSIBILITY FOR ALL LEARNERS**

British Columbia's schools include students of varied backgrounds, interests, and abilities. The Kindergarten to Grade 12 school system focusses on meeting the needs of all students. When selecting specific topics, activities, and resources to support the implementation of Social Studies K to 7, teachers are encouraged to ensure that these choices support inclusion, equity, and accessibility for all students. In particular, teachers should ensure that classroom instruction, assessment, and resources reflect sensitivity to diversity and incorporate positive role portrayals, relevant issues, and themes such as inclusion, respect, and acceptance.

Government policy supports the principles of integration and inclusion of students for whom English is a second language and of students with special needs. Most of the prescribed learning outcomes in this IRP can be addressed by all students, including those with special and/or ESL needs. Some strategies may require adaptations to ensure that those with special and/or ESL needs can successfully achieve the prescribed learning outcomes. Modifications can be made to the prescribed learning outcomes for students with Individual Education Plans.

For more information about resources and support for students with special needs, refer to [www.bced.gov.bc.ca/specialed/](http://www.bced.gov.bc.ca/specialed/)

For more information about resources and support for ESL students, refer to [www.bced.gov.bc.ca/esl/](http://www.bced.gov.bc.ca/esl/)

### **CONNECTIONS TO OTHER SUBJECT AREAS**

In the elementary years in particular, learning and instruction often take place in an integrated manner and do not always stay within the boundaries of a particular subject area. Teachers may look for ways to connect learning in social studies with any or all of the following provincially prescribed curricula:

- dance, drama, music, visual arts – the role of the arts in sustaining and communicating culture; historical and cultural contexts of the arts
- English language arts – effective communication and research strategies; the role of literature and storytelling in sustaining and communicating culture
- health and career education – group processes; leadership; families; purpose of rules; roles, rights, and responsibilities at home, at school, and in the community; needs and wants; decision making; work and jobs in the community
- mathematics – the mathematical principles of map making, particularly latitude and longitude and time zones
- science – daily and seasonal changes; resource use issues

Whatever the approach used to facilitate connections among these subject areas, it is important to maintain the integrity of each individual discipline, and ensure that all prescribed learning outcomes from each curriculum are addressed.

All current provincial curricula are available on the Internet at [www.bced.gov.bc.ca/irp/irp.htm](http://www.bced.gov.bc.ca/irp/irp.htm)

## WORKING WITH THE SCHOOL AND COMMUNITY

This curriculum addresses a wide range of skills and understandings that students are developing in other areas of their lives. It is important to recognize that learning related to this curriculum extends beyond the social studies classroom.

School and district-wide programs support and extend learning in Social Studies K to 7. Community organizations may also support the curriculum with locally developed learning resources, guest speakers, workshops, and field studies. Teachers may wish to draw on the expertise of these community organizations and members.

Bringing outside resource people into the classroom is an effective way of reinforcing content, emphasizing and practising listening skills, exposing students to different points of view, providing opportunities for discussion and debate, providing a departure point for writing, and making learning more concrete and relevant. A panel discussion also provides an opportunity for several viewpoints on an issue to be presented at the same time.

Consider the following guidelines to help achieve a successful guest speaker activity:

- Determine the nature of the presentation (e.g., lecture, question-and-answer, debate, response to students' presentations, facilitating a simulation or case study). Ensure the guest speaker is clear about the purpose, the structure, and the time allotted. There should be a direct relationship between the content of the presentation and the prescribed learning outcomes. Review any materials the speaker may use, especially any handouts, for appropriateness.
- Be aware of any district guidelines for external presenters, and ensure that guests have met these guidelines.
- Where appropriate, have students take responsibility for contacting the speaker(s) beforehand and making any logistical arrangements.
- Provide time for students to prepare for the guest speaker or panel by formulating focus questions.
- Begin the guest speaker presentation with an introduction to the topic and end with a debrief.

## WORKING WITH THE ABORIGINAL COMMUNITY

The Ministry of Education is dedicated to ensuring that the cultures and contributions of Aboriginal peoples in BC are reflected in all provincial curricula. To address these topics in the classroom in a way that is accurate and that respectfully reflects Aboriginal concepts of teaching and learning, teachers are strongly encouraged to seek the advice and support of local Aboriginal communities. As Aboriginal communities are diverse in terms of language, culture, and available resources, each community will have its own unique protocol to gain support for integration of local knowledge and expertise. To begin discussion of possible instructional and assessment activities, teachers should first contact Aboriginal education co-ordinators, teachers, support workers, and counsellors in their district who will be able to facilitate the identification of local resources and contacts such as elders, chiefs, tribal or band councils, Aboriginal cultural centres, Aboriginal Friendship Centres, and Métis or Inuit organizations.

In addition, teachers may wish to consult the various Ministry of Education publications available, including the "Planning Your Program" section of the resource, *Shared Learnings*. This resource was developed to help all teachers provide students with knowledge of, and opportunities to share experiences with, Aboriginal peoples in BC.

For more information about these documents, consult the Aboriginal Education web site: [www.bced.gov.bc.ca/abed/welcome.htm](http://www.bced.gov.bc.ca/abed/welcome.htm)

## INFORMATION AND COMMUNICATIONS TECHNOLOGY

The study of information and communications technology is increasingly important in our society. Students need to be able to acquire and analyse information, to reason and communicate, to make informed decisions, and to understand and use information and communications technology for a variety of purposes. Development of these skills is important for students in their education, their future careers, and their everyday lives.

Literacy in the area of information and communications technology can be defined as the ability to obtain and share knowledge through investigation, study, instruction, or transmission of information by means of media technology. Becoming literate in this area involves finding, gathering, assessing, and communicating information using electronic means, as well as developing the knowledge and skills to use and solve problems effectively with the technology. Literacy also involves learning about the safe and responsible use of the technology, and a critical examination and understanding of the ethical and social issues related to the use of information and communications technology. When planning for instruction and assessment in Social Studies K to 7, teachers should provide opportunities for students to develop literacy in relation to information and communications technology sources, and to reflect critically on the role of these technologies in society.

### COPYRIGHT AND RESPONSIBILITY

Copyright is the legal protection of literary, dramatic, artistic, and musical works; sound recordings; performances; and communications signals. Copyright provides creators with the legal right to be paid for their work and the right to say how their work is to be used. The law permits certain exceptions for schools (i.e., specific things permitted) but these are very limited, such as copying for private study or research. The copyright law determines how resources can be used in the classroom and by students at home.

In order to respect copyright it is necessary to understand the law. It is unlawful to do the following, unless permission has been given by a copyright owner:

- photocopy copyrighted material to avoid purchasing the original resource for any reason
- photocopy or perform copyrighted material beyond a very small part – in some cases the copyright law considers it “fair” to copy whole works, such as an article in a journal or a photograph, for purposes of research and private study, criticism, and review

- show recorded television or radio programs to students in the classroom unless these are cleared for copyright for educational use (there are exceptions such as for news and news commentary taped within one year of broadcast that by law have record-keeping requirements – see the web site at the end of this section for more details)
- photocopy print music, workbooks, instructional materials, instruction manuals, teacher guides, and commercially available tests and examinations
- show videorecordings that are not cleared for public performance
- perform music or do performances of copyrighted material for entertainment (i.e., for purposes other than a specific educational objective)
- copy work from the Internet without an express message that the work can be copied

Permission from or on behalf of the copyright owner must be given in writing. Permission may also be given to copy or use all or some portion of copyrighted work through a licence or agreement. Many creators, publishers, and producers have formed groups or “collectives” to negotiate royalty payments and copying conditions for educational institutions. It is important to know what licences are in place and how these affect the activities schools are involved in. Some licences may also require royalty payments that are determined by the quantity of photocopying or the length of performances. In these cases, it is important to assess the educational value and merits of copying or performing certain works to protect the school’s financial exposure (i.e., only copy or use that portion that is absolutely necessary to meet an educational objective).

It is important for education professionals, parents, and students to respect the value of original thinking and the importance of not plagiarizing the work of others. The works of others should not be used without their permission.

For more information about copyright, refer to [www.cmec.ca/copyright/indexe.stm](http://www.cmec.ca/copyright/indexe.stm)

**DEBATE**

Formal debate is one of the fundamental activities of democracy and, through various international organizations such as the United Nations, is also a tool for resolution of global problems and issues. Debate provides opportunities for students to integrate knowledge and communication skills, and allows for critical examination of differing viewpoints. Debate can be used at the beginning of a unit of study on a particular topic (to explore students' pre-existing knowledge and attitudes on the issue), and/or at the end of a unit of study (to summarize and represent learning).

Various forms and forums of debate are appropriate in Social Studies K to 7 classes. Examples of relevant debate forms include

- informal classroom debate
- formal debate styles (e.g., Oxford, Lincoln-Douglas, Cross-Examination)
- model parliaments, model UN
- round table discussions
- mock trials
- town hall forums
- online forums

**MEDIA ANALYSIS**

Much of the information that the public receives about issues and events is received through media messages – in newspapers and magazines, on television and radio, and on the Internet. Analysis of media messages is a valuable component of Social Studies K to 7, and allows students to think critically and independently about issues that affect them.

The following concepts of media education are examples of the ways in which teachers and students can examine a range of media messages relevant to:

- *Purpose*: People use media messages to inform, entertain, and/or persuade for political, commercial, educational, artistic, moral, and/or other purposes.
- *Values*: Media messages communicate explicit and implicit values.
- *Representation*: Media messages are constructed; they are only representations of real or imaginary worlds.
- *Codes, Conventions, and Characteristics*: Each medium has its own set of codes, conventions, and characteristics that affect the way messages are transmitted and understood.
- *Production*: People who understand the media are better able to make purposeful media messages.
- *Interpretation*: Audience members bring their knowledge, experience, and values to their interpretation of and emotional response to media messages.
- *Influence of Media on Audience*: Media messages can influence people's attitudes, behaviours, and values.
- *Influence of Audience on Media*: People can influence media institutions and the messages they produce and transmit.
- *Control*: People who control a society's dominant institutions have disproportionate influence on the construction and distribution of media messages and the values they contain.
- *Scope*: Media technologies influence and are influenced by the political, economic, social, and intellectual dimensions of societies.

# PRESCRIBED LEARNING OUTCOMES

---

**P**rescribed learning outcomes are content standards for the provincial education system; they are the prescribed curriculum. Clearly stated and expressed in measurable and observable terms, learning outcomes set out the required attitudes, skills, and knowledge – what students are expected to know and be able to do – by the end of the specified subject and grade.

Schools have the responsibility to ensure that all prescribed learning outcomes in this curriculum are met; however, schools have flexibility in determining how delivery of the curriculum can best take place.

It is expected that student achievement will vary in relation to the learning outcomes. Evaluation, reporting, and student placement with respect to these outcomes are dependent on the professional judgment and experience of teachers, guided by provincial policy.

Prescribed learning outcomes for Social Studies K to 7 are presented by grade and by curriculum organizer and are coded alphanumerically for ease of reference; however, this arrangement is not intended to imply a required instructional sequence.

### *Wording of Prescribed Learning Outcomes*

All learning outcomes complete the stem, “It is expected that students will ....”

When used in a prescribed learning outcome, the word “including” indicates that any ensuing item **must be addressed**. Lists of items introduced by the word “including” represent a set of minimum requirements associated with the general requirement set out by the outcome. The lists are not necessarily exhaustive, however, and teachers may choose to address additional items that also fall under the general requirement set out by the outcome.

### *Domains of Learning*

Prescribed learning outcomes in BC curricula identify required learning in relation to one or more of the three domains of learning: cognitive, psychomotor, and affective. The following definitions of the three domains are based on Bloom’s taxonomy.

The **cognitive domain** deals with the recall or recognition of knowledge and the development of intellectual abilities. The cognitive domain can be further specified as including three cognitive levels: knowledge, understanding and application, and higher mental processes. These levels are determined by the verb used in the learning outcome, and illustrate how student learning develops over time.

- *Knowledge* includes those behaviours that emphasize the recognition or recall of ideas, material, or phenomena.
- *Understanding and application* represents a comprehension of the literal message contained in a communication, and the ability to apply an appropriate theory, principle, idea, or method to a new situation.
- *Higher mental processes* include analysis, synthesis, and evaluation. The higher mental processes level subsumes both the knowledge and the understanding and application levels.

The **affective domain** concerns attitudes, beliefs, and the spectrum of values and value systems.

The **psychomotor domain** includes those aspects of learning associated with movement and skill demonstration, and integrates the cognitive and affective consequences with physical performances.

Domains of learning and cognitive levels also form the basis of the Assessment Overview Tables provided in the Classroom Assessment Model.

# PRESCRIBED LEARNING OUTCOMES

---

*Grade 2*

**GRADE 2**

*It is expected that students will:*

**SKILLS AND PROCESSES OF SOCIAL STUDIES**

- A1 interpret simple maps using cardinal directions, symbols, and simple legends
- A2 create simple maps representing familiar locations
- A3 gather information from a variety of sources for presentation
- A4 present information using oral, written, or visual representations
- A5 select a solution to a classroom or school problem

**IDENTITY, SOCIETY, AND CULTURE**

- B1 identify changes that occur in the school and community throughout the year
- B2 describe ways individuals contribute to a community
- B3 identify factors that influence who they are
- B4 identify significant language and cultural characteristics of Canadian society

**GOVERNANCE**

- C1 distinguish their roles, rights, and responsibilities within the classroom and school
- C2 describe how decisions are made in groups, the classroom, and the school

**ECONOMY AND TECHNOLOGY**

- D1 describe work done in the school
- D2 describe the purpose of money
- D3 describe how technology affects individuals and schools

**HUMAN AND PHYSICAL ENVIRONMENT**

- E1 locate on a map landforms and bodies of water of local and national significance, including
  - Pacific Ocean
  - Atlantic Ocean
  - Arctic Ocean
  - Vancouver Island
  - Rocky Mountains
  - locally relevant examples
- E2 describe their responsibility to the local environment
- E3 describe how the physical environment influences human activities

# STUDENT ACHIEVEMENT

---

This section of the IRP contains information about classroom assessment and student achievement, including specific achievement indicators that may be used to assess student performance in relation to each prescribed learning outcome. Also included in this section are key elements – descriptions of content that help determine the intended depth and breadth of prescribed learning outcomes.

### CLASSROOM ASSESSMENT AND EVALUATION

Assessment is the systematic gathering of information about what students know, are able to do, and are working toward. Assessment evidence can be collected using a wide variety of methods, such as

- observation
- student self-assessments and peer assessments
- quizzes and tests (written, oral, practical)
- samples of student work
- projects and presentations
- oral and written reports
- journals and learning logs
- performance reviews
- portfolio assessments

Assessment of student achievement is based on the information collected through assessment activities. Teachers use their insight, knowledge about learning, and experience with students, along with the specific criteria they establish, to make judgments about student performance in relation to prescribed learning outcomes.

Three major types of assessment can be used in conjunction with each other to support student achievement.

- **Assessment for** learning is assessment for purposes of greater learning achievement.
- **Assessment as** learning is assessment as a process of developing and supporting students' active participation in their own learning.
- **Assessment of** learning is assessment for purposes of providing evidence of achievement for reporting.

#### *Assessment for Learning*

Classroom assessment for learning provides ways to engage and encourage students to become involved in their own day-to-day assessment – to acquire the skills of thoughtful self-assessment and to promote their own achievement.

This type of assessment serves to answer the following questions:

- What do students need to learn to be successful?
- What does the evidence of this learning look like?

Assessment for learning is criterion-referenced, in which a student's achievement is compared to established criteria rather than to the performance of other students. Criteria are based on prescribed learning outcomes, as well as on suggested achievement indicators or other learning expectations.

Students benefit most when assessment feedback is provided on a regular, ongoing basis. When assessment is seen as an opportunity to promote learning rather than as a final judgment, it shows students their strengths and suggests how they can develop further. Students can use this information to redirect their efforts, make plans, communicate with others (e.g., peers, teachers, parents) about their growth, and set future learning goals.

Assessment for learning also provides an opportunity for teachers to review what their students are learning and what areas need further attention. This information can be used to inform teaching and create a direct link between assessment and instruction. Using assessment as a way of obtaining feedback on instruction supports student achievement by informing teacher planning and classroom practice.

#### *Assessment as Learning*

Assessment as learning actively involves students in their own learning processes. With support and guidance from their teacher, students take responsibility for their own learning, constructing meaning for themselves. Through a process of continuous self-assessment, students develop the ability to take stock of what they have already learned, determine what they have not yet learned, and decide how they can best improve their own achievement.

Although assessment as learning is student-driven, teachers can play a key role in facilitating how this assessment takes place. By providing regular opportunities for reflection and self-assessment, teachers can help students develop, practise, and become comfortable with critical analysis of their own learning.

***Assessment of Learning***

Assessment of learning can be addressed through summative assessment, including large-scale assessments and teacher assessments. These summative assessments can occur at the end of the year or at periodic stages in the instructional process.

Large-scale assessments, such as Foundation Skills Assessment (FSA) and Graduation Program exams, gather information on student performance throughout the province and provide information for the development and revision of curriculum. These

assessments are used to make judgments about students’ achievement in relation to provincial and national standards. There is no large-scale provincial assessment for Social Studies K to 7.

Assessment of learning is also used to inform formal reporting of student achievement.

For Ministry of Education reporting policy, refer to [www.bced.gov.bc.ca/policy/policies/student\\_reporting.htm](http://www.bced.gov.bc.ca/policy/policies/student_reporting.htm)

<b>Assessment for Learning</b>	<b>Assessment as Learning</b>	<b>Assessment of Learning</b>
<p><b>Formative assessment</b> <i>ongoing in the classroom</i></p> <ul style="list-style-type: none"> <li>• teacher assessment, student self-assessment, and/or student peer assessment</li> <li>• criterion-referenced – criteria based on prescribed learning outcomes identified in the provincial curriculum, reflecting performance in relation to a specific learning task</li> <li>• involves both teacher and student in a process of continual reflection and review about progress</li> <li>• teachers adjust their plans and engage in corrective teaching in response to formative assessment</li> </ul>	<p><b>Formative assessment</b> <i>ongoing in the classroom</i></p> <ul style="list-style-type: none"> <li>• self-assessment</li> <li>• provides students with information on their own achievement and prompts them to consider how they can continue to improve their learning</li> <li>• student-determined criteria based on previous learning and personal learning goals</li> <li>• students use assessment information to make adaptations to their learning process and to develop new understandings</li> </ul>	<p><b>Summative assessment</b> <i>occurs at end of year or at key stages</i></p> <ul style="list-style-type: none"> <li>• teacher assessment</li> <li>• may be either criterion-referenced (based on prescribed learning outcomes) or norm-referenced (comparing student achievement to that of others)</li> <li>• information on student performance can be shared with parents/guardians, school and district staff, and other education professionals (e.g., for the purposes of curriculum development)</li> <li>• used to make judgments about students’ performance in relation to provincial standards</li> </ul>

For more information about assessment for, as, and of learning, refer to the following resource developed by the Western and Northern Canadian Protocol (WNCP): *Rethinking Assessment with Purpose in Mind*.

This resource is available online at [www.wncp.ca/assessment/assess.pdf](http://www.wncp.ca/assessment/assess.pdf)

In addition, the BC Performance Standards describe levels of achievement in key areas of learning (reading, writing, numeracy, social responsibility, and information and communications technology integration) relevant to all subject areas. Teachers may wish to use the Performance Standards as resources to support ongoing formative assessment in social studies.

BC Performance Standards are available at [www.bced.gov.bc.ca/perf\\_stands/](http://www.bced.gov.bc.ca/perf_stands/)

### *Criterion-Referenced Assessment and Evaluation*

In criterion-referenced evaluation, a student's performance is compared to established criteria rather than to the performance of other students. Evaluation in relation to prescribed curriculum requires that criteria be established based on the learning outcomes.

Criteria are the basis for evaluating student progress. They identify, in specific terms, the critical aspects of a performance or a product that indicate how well the student is meeting the prescribed learning outcomes. For example, weighted criteria, rating scales, or scoring guides (reference sets) are ways that student performance can be evaluated using criteria.

Wherever possible, students should be involved in setting the assessment criteria. This helps students develop an understanding of what high-quality work or performance looks like.

#### **Criterion-referenced assessment and evaluation may involve these steps:**

- Step 1** Identify the prescribed learning outcomes and suggested achievement indicators (as articulated in this IRP) that will be used as the basis for assessment.
- Step 2** Establish criteria. When appropriate, involve students in establishing criteria.
- Step 3** Plan learning activities that will help students gain the attitudes, skills, or knowledge outlined in the criteria.
- Step 4** Prior to the learning activity, inform students of the criteria against which their work will be evaluated.
- Step 5** Provide examples of the desired levels of performance.
- Step 6** Conduct the learning activities.
- Step 7** Use appropriate assessment instruments (e.g., rating scale, checklist, scoring guide) and methods (e.g., observation, collection, self-assessment) based on the particular assignment and student.
- Step 8** Review the assessment data and evaluate each student's level of performance or quality of work in relation to criteria.
- Step 9** Where appropriate, provide feedback and/or a letter grade to indicate how well the criteria are met.
- Step 10** Communicate the results of the assessment and evaluation to students and parents/guardians.

### KEY ELEMENTS

Key elements provide an overview of content in each curriculum organizer. They can be used to determine the expected depth and breadth of the prescribed learning outcomes.

Note that some topics appear at multiple grade levels in order to emphasize their importance and to allow for developmental learning.

### ACHIEVEMENT INDICATORS

To support the assessment of provincially prescribed curricula, this IRP includes sets of achievement indicators in relation to each learning outcome.

Achievement indicators, taken together as a set, define the specific level of attitudes demonstrated, skills applied, or knowledge acquired by the student in relation to a corresponding prescribed learning outcome. They describe what evidence to look for to determine whether or not the student has fully met the intent of the learning outcome. Since each achievement indicator defines only one aspect of the corresponding learning outcome, the entire set of achievement indicators should be considered when determining whether students have fully met the learning outcome.

In some cases, achievement indicators may also include suggestions as to the type of task that would provide evidence of having met the learning outcome (e.g., a constructed response such as a list, comparison, or analysis; a product created and presented such as a report, poster, letter, or model; a particular skill demonstrated such as map making or critical thinking).

Achievement indicators support the principles of assessment for learning, assessment as learning, and assessment of learning. They provide teachers and parents with tools that can be used to reflect on what students are learning, as well as provide students with a means of self-assessment and ways of defining how they can improve their own achievement.

Achievement indicators are not mandatory; they are suggestions only, provided to assist in the assessment of how well students achieve the prescribed learning outcomes.

The following pages contain the suggested achievement indicators corresponding to each prescribed learning outcome for the Social Studies K to 7 curriculum. The achievement indicators are arranged by curriculum organizer for each grade; however, this order is not intended to imply a required sequence of instruction and assessment.

# STUDENT ACHIEVEMENT

---

*Grade 2*

**KEY ELEMENTS: GRADE 2**  
*Self, Family, School*

**SKILLS AND PROCESSES OF SOCIAL STUDIES**

- using and creating simple maps with cardinal directions, symbols, and legends
- gathering information for presentation (e.g., oral, written, models, maps, software)
- problem solving in the class or school

**IDENTITY, SOCIETY, AND CULTURE**

- changes that occur in the school and community
- ways individuals contribute to a community
- factors influencing personal identity (e.g., family, age, gender, traditions, language, geography)
- language and cultural characteristics of Canada

**ECONOMY AND TECHNOLOGY**

- work done in the school
- purpose of money
- how technology affects individuals and schools

**GOVERNANCE**

- roles, rights, and responsibilities within the class and school (e.g., participation, respect)
- how decisions are made in groups (e.g., voting, authority rule, taking turns)

**HUMAN AND PHYSICAL ENVIRONMENT**

- locating significant bodies of water and landforms in BC and Canada (e.g., Pacific Ocean, Vancouver Island, Rocky Mountains)
- responsibility to the environment (e.g., not wasting water, reusing materials)
- how the environment affects human activities

## SKILLS AND PROCESSES OF SOCIAL STUDIES

The following learning outcomes provide students with a framework of developmental skills and processes that are used throughout the curriculum. These outcomes are not intended to be taught in isolation, but rather should be integrated in context with content related to the other four curriculum organizers.

Prescribed Learning Outcomes	Suggested Achievement Indicators
<i>It is expected that students will:</i>	<p><i>The following set of indicators may be used to assess student achievement for each corresponding prescribed learning outcome.</i></p> <p><i>Students who have fully met the prescribed learning outcome are able to:</i></p>
A1 interpret simple maps using cardinal directions, symbols, and simple legends	<ul style="list-style-type: none"> <li><input type="checkbox"/> use cardinal directions to identify relative locations on simple maps (e.g., the school is north of the park)</li> <li><input type="checkbox"/> use cardinal directions to follow a simple map to a specific location</li> <li><input type="checkbox"/> interpret symbols and legends on maps to identify given locations in the community (e.g., schools, roads, railways, playgrounds, museums)</li> </ul>
A2 create simple maps representing familiar locations	<ul style="list-style-type: none"> <li><input type="checkbox"/> create simple maps of familiar locations (e.g., the school and grounds)</li> <li><input type="checkbox"/> use cardinal directions in their maps of familiar locations</li> <li><input type="checkbox"/> place appropriate titles on their maps</li> </ul>
A3 gather information from a variety of sources for presentation	<ul style="list-style-type: none"> <li><input type="checkbox"/> list a variety of information sources (e.g., library, classroom books, magazines, family members, computer resources, video, personal experiences)</li> <li><input type="checkbox"/> use simple graphic organizers (e.g., charts, webs, W5) to record relevant information from selected sources</li> <li><input type="checkbox"/> draw simple interpretations from personal experiences, oral sources, and visual and written representations</li> </ul>
A4 present information using oral, written, or visual representations	<ul style="list-style-type: none"> <li><input type="checkbox"/> use selected communication forms (e.g., presentation software, models, maps, oral, written) to accomplish given presentation tasks</li> </ul>
A5 select a solution to a classroom or school problem	<ul style="list-style-type: none"> <li><input type="checkbox"/> ask relevant questions to clarify a classroom or school problem</li> <li><input type="checkbox"/> brainstorm and compare a variety of responses to a given classroom or school problem</li> <li><input type="checkbox"/> describe ways to choose a response to a problem (e.g., voting or majority rule, consensus, authority rule)</li> <li><input type="checkbox"/> predict the possible results of various solutions to a problem</li> <li><input type="checkbox"/> demonstrate willingness to consider diverse points of view</li> <li><input type="checkbox"/> individually or as a group, select a response to a problem and provide reasons to support their choice</li> </ul>

## IDENTITY, SOCIETY, AND CULTURE

Prescribed Learning Outcomes	Suggested Achievement Indicators
<i>It is expected that students will:</i>	<p><i>The following set of indicators may be used to assess student achievement for each corresponding prescribed learning outcome.</i></p> <p><i>Students who have fully met the prescribed learning outcome are able to:</i></p>
B1 identify changes that occur in the school and community throughout the year	<ul style="list-style-type: none"> <li><input type="checkbox"/> describe some of the events and activities unique to each season</li> <li><input type="checkbox"/> identify events or characteristics that reflect changes in the community (e.g., construction, real estate signs, traffic patterns)</li> </ul>
B2 describe ways individuals contribute to a community	<ul style="list-style-type: none"> <li><input type="checkbox"/> list and carry out specific roles and responsibilities in classroom groups (e.g., group leader, blackboard monitor, helper of the day)</li> <li><input type="checkbox"/> list ways of participating in their school and community (e.g., attending school assemblies, helping a neighbour, being a reading buddy, recycling, donating to charity, looking after the class pet over the holiday, litter pickup, planting a tree or community garden, visiting a seniors' home)</li> </ul>
B3 identify factors that influence who they are	<ul style="list-style-type: none"> <li><input type="checkbox"/> give examples of factors that contribute to their identity (e.g., age, language, family, community, traditions, gender, where they live, stories of the past)</li> <li><input type="checkbox"/> demonstrate awareness of the variety of traditions and celebrations in their school and community</li> <li><input type="checkbox"/> identify and share stories, traditions, and celebrations of their community</li> <li><input type="checkbox"/> describe ways of demonstrating respect for their own and others' identities (e.g., standing still during the national anthem, participating willingly in cultural celebrations, including others in their activities, not making fun of unfamiliar food or clothing)</li> </ul>
B4 identify significant language and cultural characteristics of Canadian society	<ul style="list-style-type: none"> <li><input type="checkbox"/> identify English and French as the two official languages of Canada, and give examples of how this is represented (e.g., <i>O Canada</i> has lyrics in both English and French, both languages appear on product packages)</li> <li><input type="checkbox"/> demonstrate awareness that a variety of languages are spoken in Canada</li> <li><input type="checkbox"/> demonstrate awareness that Canada is a multicultural society (e.g., name diverse cultural groups represented in Canada)</li> <li><input type="checkbox"/> give examples of how heritage is represented in their school and community (e.g., the history and significance of local landmarks, buildings, street names, public art)</li> <li><input type="checkbox"/> identify the meaning of selected Canadian symbols (e.g., Canadian flag, maple leaf, beaver, parliament buildings, inuksuit, poppy)</li> </ul>

## GOVERNANCE

Prescribed Learning Outcomes	Suggested Achievement Indicators
<i>It is expected that students will:</i>	<i>The following set of indicators may be used to assess student achievement for each corresponding prescribed learning outcome.</i> <i>Students who have fully met the prescribed learning outcome are able to:</i>
C1 distinguish their roles, rights, and responsibilities within the classroom and school	<input type="checkbox"/> give examples of their responsibilities as a member of the classroom (e.g., participating in making a classroom decision, working co-operatively in groups, respecting diverse viewpoints and the contributions of people with diverse abilities) <input type="checkbox"/> discuss and describe their roles and responsibilities in addressing needs or problems in the class and school (e.g., cleaning up classroom messes)
C2 describe how decisions are made in groups, the classroom, and the school	<input type="checkbox"/> discuss processes for decision making in the classroom and school, such as deciding what game to play in PE, choosing working groups, sharing classroom supplies, or activity centres (e.g., teacher decides, taking turns, classroom meeting, show of hands)

## ECONOMY AND TECHNOLOGY

Prescribed Learning Outcomes	Suggested Achievement Indicators
<i>It is expected that students will:</i>	<i>The following set of indicators may be used to assess student achievement for each corresponding prescribed learning outcome.</i> <i>Students who have fully met the prescribed learning outcome are able to:</i>
D1 describe work done in the school	<input type="checkbox"/> identify types of work done by people in the school (e.g., custodians keep the school warm, clean, and safe; teachers help us learn; parent volunteers help with breakfast and lunch programs) <input type="checkbox"/> select one job done in the school and describe how it meets people's needs and wants
D2 describe the purpose of money	<input type="checkbox"/> give a range of examples of the goods and services that can be bought and sold using money (e.g., food, shelter, transportation, clothing, entertainment)
D3 describe how technology affects individuals and schools	<input type="checkbox"/> describe ways in which specific technologies help people accomplish tasks and make work easier at school (e.g., for researching information, for creating and presenting information, for communicating with many people at once, for assisting students with special needs)

## HUMAN AND PHYSICAL ENVIRONMENT

Prescribed Learning Outcomes	Suggested Achievement Indicators
<i>It is expected that students will:</i>	<p><i>The following set of indicators may be used to assess student achievement for each corresponding prescribed learning outcome.</i></p> <p><i>Students who have fully met the prescribed learning outcome are able to:</i></p>
E1 locate on a map landforms and bodies of water of local and national significance, including <ul style="list-style-type: none"> <li>- Pacific Ocean</li> <li>- Atlantic Ocean</li> <li>- Arctic Ocean</li> <li>- Vancouver Island</li> <li>- Rocky Mountains</li> <li>- locally relevant examples</li> </ul>	<ul style="list-style-type: none"> <li><input type="checkbox"/> create a model or other representation of landforms and bodies of water (e.g., lakes, rivers, valleys, mountains, islands)</li> <li><input type="checkbox"/> on maps of BC and Canada, locate major landforms and bodies of water, including               <ul style="list-style-type: none"> <li>- Pacific Ocean</li> <li>- Atlantic Ocean</li> <li>- Arctic Ocean</li> <li>- Vancouver Island</li> <li>- Rocky Mountains</li> </ul> </li> <li><input type="checkbox"/> from a map, model, or pictures, identify landforms and bodies of water of local significance</li> </ul>
E2 describe their responsibility to the local environment	<ul style="list-style-type: none"> <li><input type="checkbox"/> contribute to class discussions about environmental issues (e.g., pollution, over-use of non-renewable resources)</li> <li><input type="checkbox"/> create a list of things they can do to positively affect their local environment (e.g., not wasting water, reusing paper, litterless lunches, planting gardens and trees)</li> </ul>
E3 describe how the physical environment influences human activities	<ul style="list-style-type: none"> <li><input type="checkbox"/> provide specific examples from the local community to describe how the physical environment influences human activities (e.g., recreational activities, clothing, shelter, transportation routes)</li> </ul>

# CLASSROOM ASSESSMENT MODEL

---

The Classroom Assessment Model outlines a series of assessment units for Social Studies K to 7.

These units have been structured by grade level and theme. Collectively the units address all of the prescribed learning outcomes for each grade, and provide one suggested means of organizing, ordering, and delivering the required content. This organization is not intended to prescribe a linear means of delivery. Teachers are encouraged to reorder the learning outcomes and to modify, organize, and expand on the units to meet the needs of their students, to respond to local requirements, and to incorporate relevant recommended learning resources as applicable. (See the Learning Resources section later in this IRP for information about the recommended learning resources for Social Studies K to 7.) In addition, teachers are encouraged to consider ways to adapt assessment activities from one grade to another.

### *Classroom Assessment and Evaluation*

Teachers should consider using a variety of assessment instruments and techniques to assess students' abilities to meet the prescribed learning outcomes and to support assessment for, of, and as learning.

Tools and techniques for assessment in social studies K to 7 can include

- teacher assessment tools such as observation checklists, rating scales, and scoring guides
- self-assessment tools such as checklists, rating scales, and scoring guides
- peer assessment tools such as checklists, rating scales, and scoring guides
- journals or learning logs
- written tests, oral tests (true/false, multiple choice, short answer)
- questionnaires, worksheets
- portfolios
- student-teacher conferences

Assessment in social studies K to 7 can also occur while students are engaged in, and based on the product of, activities such as

- group and class discussions
- maps, timelines, models
- brainstorming, clusters, charts, graphs

- role plays
- drawings, posters, collages, songs, poems
- peer teaching
- debates
- field trips
- research projects
- oral and multimedia presentations

For more information about student assessment, refer to the section on Student Achievement, as well as to the Assessment Overview Tables in each grade of the Classroom Assessment Model.

## CONTENTS OF THE MODEL

### *Assessment Overview Tables*

The Assessment Overview Tables provide teachers with suggestions and guidelines for assessment of each grade of the curriculum. These tables identify the domains of learning and cognitive levels of the learning outcomes, along with a listing of suggested assessment activities and a suggested instructional time and weight for grading for each curriculum organizer.

### *Overview*

Each grade includes an overview of the assessment units, containing

- a listing of Learning at Previous Grades, indicating any relevant topics based on prescribed learning outcomes from earlier grades of the same subject area; it is assumed that students will have already acquired this learning – if they have not, additional introductory instruction may need to take place before undertaking the suggested assessment outlined in the unit (note that some topics appear at multiple grade levels in order to emphasize their importance and to allow for reinforcement and developmental learning)
- a table (provided for grades 2 to 7) that shows which prescribed learning outcomes are addressed by each unit in this grade of the Classroom Assessment Model

### *Prescribed Learning Outcomes*

Each unit begins with a listing of the prescribed learning outcomes that are addressed by that unit. Collectively, the units address all the learning outcomes for that grade; some outcomes may appear in more than one unit.

### *Suggested Assessment Activities*

Assessment activities have been included for each set of prescribed learning outcomes. Each assessment activity consists of two parts:

- Planning for Assessment – outlining the background information to explain the classroom context, opportunities for students to gain and practise learning, and suggestions for preparing the students for assessment
- Assessment Strategies – describing the assessment task, the method of gathering assessment information, and the assessment criteria as defined by the learning outcomes and achievement indicators

A wide variety of activities have been included to address a variety of learning and teaching styles. The assessment activities describe a variety of tools and methods for gathering evidence of student performance.

These assessment activities are suggestions only, designed to provide guidance for teachers in planning instruction and assessment to meet the prescribed learning outcomes.

### *Assessment Instruments*

Sample assessment instruments have been included at the end of each grade, and are provided to help teachers determine the extent to which students are meeting the prescribed learning outcomes. These instruments contain criteria specifically keyed to one or more of the suggested assessment activities contained in the units.

For additional assessment support, teachers are encouraged to use the BC performance standards for Social Responsibility to assess students in relation to

- contributing to a safe and caring school environment (Section 1)
- solving problems in peaceful ways (Section 2)
- valuing diversity and defending human rights (Section 3)

BC Performance Standards are available online at [www.bced.gov.bc.ca/perf\\_stands/](http://www.bced.gov.bc.ca/perf_stands/)

# CLASSROOM ASSESSMENT MODEL

---

*Grade 2*

## SOCIAL STUDIES GRADE 2: ASSESSMENT OVERVIEW TABLE

The purpose of this table is to provide teachers with suggestions and guidelines for formative and summative assessment and grading of Social Studies for Grade 2.

Curriculum Organizers	Suggested Assessment Activities	Suggested Weight for Grading	Suggested Time Allotment	Number of Outcomes	Number of Outcomes by Domain*				
					K	U&A	HMP		
SKILLS AND PROCESSES OF SOCIAL STUDIES	<ul style="list-style-type: none"> <li>• maps, charts</li> <li>• pictures, collages, posters, mind maps, models, dramatizations, big books</li> <li>• group and class discussions</li> <li>• journals, learning logs</li> <li>• role plays</li> <li>• simulations</li> <li>• field trips</li> <li>• interviews</li> <li>• worksheets, guided responses</li> <li>• research, presentations</li> </ul>	15-25%	integrated throughout	5	A3	A1, A2, A4	A5	A5	
		15-25%	20-30 h	4	B1, B3, B4	B2			
		15-25%	20-30 h	2		C1, C2			
ECONOMY AND TECHNOLOGY		15-25%	20-30 h	3	D1	D2, D3			
HUMAN AND PHYSICAL ENVIRONMENT		15-25%	20-30 h	3	E1	E3	E2	E2	
<b>Total:</b>					<b>6</b>	<b>9</b>	<b>2</b>	<b>2</b>	
					<b>17</b>				
					<b>100%</b>	<b>90-100 h</b>			

\* Prescribed learning outcomes in BC curricula identify required learning in relation to one or more of the three domains of learning: cognitive, psychomotor, and affective. The following abbreviations are used to represent the three levels within the cognitive domain: K = Knowledge; U&A = Understanding and Application; HMP = Higher Mental Processes. The abbreviation AFF = the affective domain.

Note that some learning outcomes address both the cognitive and affective domains, as represented in this table. For more information on domains of learning and cognitive levels, refer to the section on Prescribed Learning Outcomes.

## GRADE 2

## OVERVIEW

*Learning at Previous Grades*

- using simple picture maps
- co-operative participation in groups
- gathering information (e.g., from audio, visual, material, print)
- presenting information orally, visually, and written
- strategies for solving school-based problems
- changes in their lives
- similarities and differences among families (e.g., composition, culture, traditions, roles)
- social structures (e.g., family, clan, after-school classes and groups)
- ways people work together in groups
- symbols of Canada
- roles, responsibilities, and rights at home and at school
- purpose of classroom and school rules
- basic human needs (e.g., food, water, clothing, safety) and how they are met
- types of work in the community
- purpose of money
- ways technology is used to accomplish tasks
- recognizing maps of Canada
- natural characteristics of environments (e.g., mountains, rivers, forests, marshes)
- human-built characteristics of local environments (e.g., roads, buildings, bridges)
- how the environment affects daily life
- ways to care for their environment (e.g., reduce, reuse, recycle)

The following table shows which prescribed learning outcomes are addressed by each unit in this grade of the Classroom Assessment Model. Note that some prescribed learning outcomes are addressed in more than one unit.

Mapping	Community and Culture	Work and Decision Making	Seasonal Changes
A1, A2	A3, A4	A5	A4
	B3, B4	B2	B1
		C1, C2	
		D1, D2, D3	
E1, E2, E3			

## Mapping

### Prescribed Learning Outcomes

*It is expected that students will:*

#### SKILLS AND PROCESSES OF SOCIAL STUDIES

- A1 interpret simple maps using cardinal directions, symbols, and simple legends
- A2 create simple maps representing familiar locations

#### HUMAN AND PHYSICAL GEOGRAPHY

- E1 locate on a map landforms and bodies of water of local and national significance, including
  - Pacific Ocean
  - Atlantic Ocean
  - Arctic Ocean
  - Vancouver Island
  - Rocky Mountains
  - locally relevant examples
- E2 describe their responsibility to the local environment
- E3 describe how the physical environment influences human activities

PLANNING FOR ASSESSMENT	ASSESSMENT STRATEGIES
<ul style="list-style-type: none"> <li>• Introduce cardinal directions (north, south, east, west), by labelling the walls of the classroom. Conduct daily games that involve having students point or move in response to directions called out. Students can also create their own games using spinners, etc.</li> </ul> <p>Take students outside to a location where they can see multiple landmarks, street names, etc. Show them a map of the community with these locations marked, and have them identify each one in relation to cardinal directions. Call out directions and have students walk north, south, etc.</p>	<ul style="list-style-type: none"> <li>• Provide students with pictures of various community landmarks. Have students work in groups to create a simple map that follows the route they walked outside, locating each landmark correctly.</li> </ul> <p>Brainstorm with students how they could reproduce the map using symbols to represent the landmarks in the pictures. Have them generate a simple legend to describe the symbols used on the map. Look for evidence that students' maps</p> <ul style="list-style-type: none"> <li>– accurately use cardinal directions</li> <li>– include an appropriate title</li> <li>– incorporate appropriate symbols</li> </ul>
<ul style="list-style-type: none"> <li>• Review various locations in the community, and point out places where students can play an active role in protecting or positively affecting the environment (e.g., recycling, participating in a supervised garbage clean-up, planting trees, not picking wildflowers, not wasting water).</li> </ul>	<ul style="list-style-type: none"> <li>• Have students draw a picture of themselves participating in at least one activity that positively affects the environment of the local community. Look for evidence that their drawings reflect an understanding of                     <ul style="list-style-type: none"> <li>– the various activities they can do, based on class discussions</li> <li>– their personal responsibility in protecting the local environment</li> </ul> </li> </ul>
<ul style="list-style-type: none"> <li>• Show students a map of Canada. Help them locate the community and major landforms and bodies of water that are north, south, east, and west of the community.</li> </ul>	<ul style="list-style-type: none"> <li>• Provide students with a blank map of Canada, and have them locate and label landforms and bodies of water discussed in class, such as                     <ul style="list-style-type: none"> <li>– Pacific Ocean</li> <li>– Atlantic Ocean</li> <li>– Arctic Ocean</li> <li>– Vancouver Island</li> <li>– Rocky Mountains</li> </ul> </li> </ul>

## Community and Culture

<p style="text-align: center;"><b>Prescribed Learning Outcomes</b></p> <p><i>It is expected that students will:</i></p> <p><b>SKILLS AND PROCESSES OF SOCIAL STUDIES</b>                      A3 gather information from a variety of sources for presentation                      A4 present information using oral, written, or visual representations</p> <p><b>IDENTITY, SOCIETY, AND CULTURE</b>                      B3 identify factors that influence who they are                      B4 identify significant language and cultural characteristics of Canadian society</p>	
PLANNING FOR ASSESSMENT	ASSESSMENT STRATEGIES
<ul style="list-style-type: none"> <li>• Have students choose a culture that represents their personal heritage or another culture from the local community, and research information on that culture’s language, culture, food, traditional clothing, festivals etc. Students should organize their information on a poster and give a creative presentation of some aspect of the culture (e.g., a dance, costume, food item).</li> </ul>	<ul style="list-style-type: none"> <li>• Develop criteria with the class to assess posters following guidelines of criteria referenced instruction. These criteria can be used as the basis of peer, teacher, and/or self-assessment. Follow up by creating a class collage of cultural characteristics represented in the community.</li> </ul>
<ul style="list-style-type: none"> <li>• Ask students to find out about items that are significant to their family or heritage and place a picture of the item in a box. Have them bring their boxes to school and share why the item is significant and how it tells something about who they are.</li> </ul>	<ul style="list-style-type: none"> <li>• When students present their significant items, look for evidence that they recognize the significance of the item and can identify it as something that is meaningful in their personal and family history.</li> </ul> <p>Follow up by having students complete one or more sentence response(s) to indicate impressions of their own and their peers’ heritage box presentations, completing sentence stems such as the following:</p> <ul style="list-style-type: none"> <li>- I liked _____.</li> <li>- I learned _____.</li> <li>- I think _____.</li> <li>- I remember _____.</li> </ul>

## Work and Decision Making

### Prescribed Learning Outcomes

*It is expected that students will:*

#### SKILLS AND PROCESSES OF SOCIAL STUDIES

A5 select a solution to a classroom or school problem

#### IDENTITY, SOCIETY, AND CULTURE

B2 describe ways individuals contribute to a community

#### GOVERNANCE

C1 distinguish their roles, rights, and responsibilities within the classroom and school

C2 describe how decisions are made in groups, the classroom, and the school

#### ECONOMY AND TECHNOLOGY

D1 describe work done in the school

D2 describe the purpose of money

D3 describe how technology affects individuals and schools

PLANNING FOR ASSESSMENT	ASSESSMENT STRATEGIES
<ul style="list-style-type: none"> <li>Discuss roles, rights, and responsibilities in the classroom. List tasks that need to be completed in the classroom. Discuss how the need for tasks to be completed can create a problem in the classroom (e.g. assigning tasks, someone is away when it is their assigned day, change of circumstances create new needs). Brainstorm how responsibility for completing tasks can be resolved in the classroom (e.g. assigned monitors, individual responsibilities).</li> </ul> <p>Bring in examples of classified ads to show how these are used to find someone to be responsible for a job or task. Challenge students to work individually or in groups to create a want ad to find someone in the class for a task.</p>	<ul style="list-style-type: none"> <li>Collect students' completed ads, and look for evidence that they have included the role, right, and responsibility of the person who will complete the task. For example, for the task of making sure the coats are hung on hooks in the coat room:                             <ul style="list-style-type: none"> <li>Role: Coat Room Monitor</li> <li>Right: be the last one to sit at desk after recess</li> <li>Responsibility: check if any coats have been left on the floor in the coat room</li> </ul> </li> </ul> <p>During class discussion, observe students' level of understanding from questions, comments contributed, and abilities to give examples of roles, rights and responsibilities.</p>
<ul style="list-style-type: none"> <li>Discuss the meaning and purpose of mascots. Ask students to suggest examples from the school, community, or other sources (e.g., professional sports teams).</li> </ul> <p>Divide the class into small groups and have them choose an animal for their group mascot. After the group makes the decision, discuss how the decision was made. Then, decide to select one of the animals chosen by the groups to be the mascot for the whole class. Discuss how the class can make the decision to choose the animal and proceed in the agreed way. Extend by discussing how a mascot could be chosen for the school.</p>	<ul style="list-style-type: none"> <li>Assign a role to each group member – recorder, observer, leader, encourager, etc. Observe participation in class discussion and group decision-making exercise. Have students rate their participation in the group activity and their satisfaction with group choice.</li> </ul> <p>As an extension, conduct an election campaign for class or school mascot.</p>

PLANNING FOR ASSESSMENT	ASSESSMENT STRATEGIES
<ul style="list-style-type: none"> <li>Review the school's rights and responsibilities as well as the classroom rules. Have students share ideas about how to address needs and problems that arise in the class and school. Allow students to role play examples of problems or needs that they might have.</li> </ul>	<ul style="list-style-type: none"> <li>Have students complete a journal entry to reflect on what they have learned about                             <ul style="list-style-type: none"> <li>their roles, rights, and responsibilities in the classroom and the school</li> <li>various ways decisions are made in the classroom and school (e.g., teacher decides, taking turns, classroom meeting, show of hands)</li> </ul> </li> </ul>
<ul style="list-style-type: none"> <li>After brainstorming roles and jobs of individuals working in the school, generate a class list of appropriate questions to ask someone about their role (e.g., area of responsibility, duties, training needed). As a class, come to a consensus about four or five questions to form a questionnaire. Divide class into small groups to interview various school employees or invite employees to visit the class for group members to interview. When the interview is completed, have each group prepare a poster featuring the employee and her or his role in the school.</li> </ul>	<ul style="list-style-type: none"> <li>Have students work in their groups to complete a job profile chart for one of the jobs presented by another group. Look for evidence that they are able to accurately recall and organize information into logical categories.  Follow up by having students write a thank-you letter to the people they interviewed.</li> </ul>
<ul style="list-style-type: none"> <li>Challenge students to create a new job position in the school. Ask them to give the person a title, a job description, and a description of the technology the person can use to complete the job.</li> </ul>	<ul style="list-style-type: none"> <li>Have students present the new job they've created. Assess participation in group discussions, and students' abilities to relate technology to the jobs identified.</li> </ul>
<ul style="list-style-type: none"> <li>Inform students that they are going to participate in a market simulation, but instead of using money the class must decide on rules for exchanging goods. Discuss how they might assign values to different items. Ask each student to invent or design something original to bring to the market (e.g., drawing, craft). Give students a time limit to complete exchanges according to the rules they generated, and complete a PMI (Plus, Minus, Interesting) for the rules for exchanging goods. Hold the market again using play money and allowing students to put a price tag on their invention (up to 5 cents). After a set time, complete a PMI for using money as a means of exchange. Discuss similarities and differences for each way of exchanging goods.</li> </ul>	<ul style="list-style-type: none"> <li>Observe students' participation in the market simulation and their abilities to follow the agreed-upon rules. Collect students' completed PMI charts, looking for evidence that they are able to reflect on the experience and the different ways that goods can be exchanged.</li> </ul>

## Seasonal Changes

### Prescribed Learning Outcomes

*It is expected that students will:*

#### SKILLS AND PROCESSES OF SOCIAL STUDIES

A4 present information using oral, written, or visual representations

#### IDENTITY, SOCIETY, AND CULTURE

B1 identify changes that occur in the school and community throughout the year

PLANNING FOR ASSESSMENT	ASSESSMENT STRATEGIES
<ul style="list-style-type: none"> <li>• Over the course of the year, conduct weekly discussions about the events or things in the school and community that have changed since the previous week. Include a discussion on changes such as                             <ul style="list-style-type: none"> <li>– weather</li> <li>– changes in the environment (e.g., leaves falling, flowers blooming, bodies of water freezing over)</li> <li>– celebrations and festivals</li> <li>– new buildings, roads, etc. in the community, or buildings that have been torn down</li> <li>– people that have moved to or left the community</li> </ul> </li> </ul> <p>At the end of each discussion, have students draw a quick picture, create a word map, or create another representation of one or more of the changes identified.</p>	<ul style="list-style-type: none"> <li>• At the end of the year, display all the images that students created related to changes that have occurred. Have students work in groups to use the images to create a collage depicting one period of time from the past year (e.g., a month, a season). Use criteria such as those found in the sample assessment unit provided at the end of this grade (<b>Change Collage</b>) as the basis of peer and self assessment of students' collages and group processes.</li> </ul>

*Assessment Instrument*  
**CHANGE COLLAGE**

Presenting group members:

Assessed by:

	<b>Peer Assessment</b>	<b>Group Self-Assessment</b>
1=not yet meeting expectations, 2=approaching expectations, 3=fully meets expectations		
<ul style="list-style-type: none"> <li>used appropriate communication forms to accomplish the presentation tasks</li> </ul>		
<ul style="list-style-type: none"> <li>described in detail a variety of events and activities unique to each time period or season</li> </ul>		
<ul style="list-style-type: none"> <li>identified events or characteristics that reflect changes in the community</li> </ul>		
<ul style="list-style-type: none"> <li>group members worked effectively together</li> </ul>		
<ul style="list-style-type: none"> <li>all group members contributed to the group project</li> </ul>		

**Comments**

# LEARNING RESOURCES

---

### ***What Are Recommended Learning Resources?***

Recommended learning resources are resources that have undergone a provincial evaluation process using teacher evaluators and have Minister's Order granting them provincial recommended status. These resources may include print, video, software and CD-ROMs, games and manipulatives, and other multimedia formats. They are generally materials suitable for student use, but may also include information aimed primarily at teachers.

Information about the recommended resources is organized in the format of a Grade Collection. A Grade Collection can be regarded as a "starter set" of basic resources to deliver the curriculum. In many cases, the Grade Collection provides a choice of more than one resource to support curriculum organizers, enabling teachers to select resources that best suit different teaching and learning styles. Teachers may also wish to supplement Grade Collection resources with locally approved materials.

### ***How Can Teachers Choose Learning Resources to Meet Their Classroom Needs?***

Teachers must use either

- provincially recommended resources
- OR
- resources that have been evaluated through a local, board-approved process

Prior to selecting and purchasing new learning resources, an inventory of resources that are already available should be established through consultation with the school and district resource centres. The ministry also works with school districts to negotiate cost-effective access to various learning resources.

### ***What Are the Criteria Used to Evaluate Learning Resources?***

The Ministry of Education facilitates the evaluation of learning resources that support BC curricula, and that will be used by teachers and/or students for instructional and assessment purposes. Evaluation criteria focus on content, instructional design, technical considerations, and social considerations.

Additional information concerning the review and selection of learning resources is available from the ministry publication, *Evaluating, Selecting and Managing Learning Resources: A Guide* (Revised 2002)  
[www.bced.gov.bc.ca/irp/resdocs/esm\\_guide.pdf](http://www.bced.gov.bc.ca/irp/resdocs/esm_guide.pdf)

### ***What Funding is Available for Purchasing Learning Resources?***

As part of the selection process, teachers should be aware of school and district funding policies and procedures to determine how much money is available for their needs. Funding for various purposes, including the purchase of learning resources, is provided to school districts. Learning resource selection should be viewed as an ongoing process that requires a determination of needs, as well as long-term planning to co-ordinate individual goals and local priorities.

### ***What Kinds of Resources Are Found in a Grade Collection?***

The Grade Collection charts list the recommended learning resources by media format, showing links to the curriculum organizers. Each chart is followed by an annotated bibliography. Teachers should check with suppliers for complete and up-to-date ordering information. Most suppliers maintain web sites that are easy to access.

### **SOCIAL STUDIES K TO 7**

#### **GRADE COLLECTIONS**

The Grade Collections for Social Studies K to 7 include newly recommended learning resources as well as relevant resources previously recommended for prior versions of the Social Studies K to 7 curriculum. The ministry updates the Grade Collections on a regular basis as new resources are developed and evaluated.

Please check the following ministry web site for the most current list of recommended learning resources in the Grade Collections for each IRP:

[www.bced.gov.bc.ca/irp\\_resources/lr/resource/gradcoll.htm](http://www.bced.gov.bc.ca/irp_resources/lr/resource/gradcoll.htm)
